Digital printerⁱ^[1] maker Roland DGA Corp., Irvine, Calif., in partnership with software developer Corel Corp., Ottawa, Ontario, Canada, announces that Corel's new CorelDRAW Graphics Suite X5 now features Roland Color Libraries for contour cutting and spot colorⁱ^[2] matching, including the company's entire metallic color library supporting new VersaCAMM and SOLJET metallic inkjet printerⁱ^[3]/cutters. The addition of these libraries greatly simplifies the production process for Roland customers that design using CorelDRAW Graphics Suite, the company says.

Roland inkjet printers and printer/cutters come with the Roland Color System, one of the many features in Roland VersaWorks RIPⁱ^[4] software. With the new release, CorelDRAW Graphics Suite now features all of the system's libraries including: Roland Color Library, Roland Metallic Color Library, an additional library for printing Roland's white, clear and metallic silver inks and creating contour cut lines recognized by Roland printer/cutters and cutters. For more information about CorelDRAW Graphics Suite X5, or to download a free, fully-functional trial version, visit www.corel.com/coreldraw ^[5].
